STAT 312: Midterm Exam 2 – Fall 2026

Instructor: Dr. Md Mutasim Billah

Department of Mathematics, Applied Mathematics, and Statistics

Basic Statistics for Engineering and Science

Full Name: _____ **Section:** _____

Read each problem carefully and answer accordingly.

For computational problems, show your setup, supporting work, and final answer, unless otherwise stated. Clearly box or circle your final answer.

The z- and t-tables are provided at the end of the exam. You may carefully detach them if needed, without disturbing the exam booklet's staples. The tables do not need to be submitted.

You may use a physical calculator during the exam. Phone calculators are not permitted.

You may use one sheet of notes with writing on one side only. Writing on both sides is not permitted. You don't need to submit this formula note along with the Exam, keep it for the final!

There are 16 regular problems and 1 extra-credit problem.

You have 50 minutes to complete and submit the exam.

Academic Integrity:

Students must complete the exam independently. Giving or receiving assistance and using unauthorized resources are prohibited. Permitted resources are limited to a physical calculator and one formula sheet with writing on one side only. ***Academic integrity is taken very seriously.*** Confirmed violations will result in a score of zero on the exam and may be reported to the Dean of Students in accordance with university policy.

Please read and sign the following honor pledge.

"On my honor, I have neither given nor received unauthorized aid on this examination."
